Thanks for the update. Can we talk briefly this afternoon? 3:15 or 3:30? Please send a call in number.

Thanks

Subject: Follow-up to NJDEP Call Today

Ray/Stephanie:

Had our call with NJDEP today. Dave Risilia ran the call which had no Case Management participants on it.

It went okay other than running out of chap stik. They were expecting push back from us which didn't happen leaving Dave pleasantly surprised. NJDEP (Ann Hayden) seemed okay with us submitting the Water Quality Monitoring Plan outline on Friday. Tim Kubiak expressed concern over COPC detection levels - this was in response to our indicating that we were going to submit CWCM data and all available pore water data with the outline on Friday - and follow the CWCM QAPP and add a location above RM 10.9.

Can we discuss with you compliance with USACE's permitting (Nationwide Permit #38) for the RM 10.9 RA? What did Tierra do for Phase 1? We had assumed that NJDEP would also be the lead on this since R2 has delegated many aspects of the CWA to New Jersey.

Thx,

Bill P.
